For Chief Secy. to Govt

N.P. 3244

20-8-41.

Returned to the Chief Secy to Govt
with Compliments:

The Elec. Dept. has no Diesel
Engine generating sets of 22 kW
or larger and no motor launch
Engines of any size -
there are two 25 kW steam generating
sets in the Palace but they are
no longer in service as they
were first installed about
1900 & have now been condemned
as unsafe for pressures of
more than about 75 to 80 lbs per
sq in -

We also have a 16 kW Diesel
Engine set at Karapur of
only 16 kW, but it cannot
be spared unless Govt
decides that it may be
sent to the Naval Dept.

Generating Sets and Diesel Motor Launch engines required by Naval Headquarters

General and Revenue
Secretariat

File No.

of 194

[App. F. III -2]

Serial
No.

It is seen from the C-2-20 minute report that no generating sets and Diesel Motor Launch engines of the description required are available.

Regarding the last para of the C-2-20 minute (16 KW Diesel Engine Set at Kharapur) the Resident requires only Diesel set of not less than 22 KW 110 volts D.C. and as such the question of sparing it does not seem to arise. Subd with a draft reply to the Resident for consideration.

PS
26/8

~~Ref. A. in C.E.C. note, the
Huzar Secy. may perhaps be consulted
if the two generating sets referred to
can be spared, and these may
be offered if the Naval Headquarters
can make any possible use of them.
If this be deemed not worth
offering, the draft reply may
be approved.~~

Draft may be approved.

Secret & Urgent.
D.O.No.F.14/1941.

Bangalore, 13th August 1941.

CB.
MS
13/8/41
C.S. 5 in consideration.

Generating sets and Diesel Motor Launch engines
required by Naval headquarters.

My Dear Kapavangar,

I am desired to say that Generating sets and Diesel Launch/Boat engines of the following descriptions are urgently required for Naval services and to enquire whether the Mysore Government can spare any and if so on what terms.

A. Generating sets.

New or second hand, steam or Diesel or petrol generating sets of not less than 22 KW 110 volts D.C and complete with shunt regulators.

In the case of steam driven sets they should be capable of working with full boiler pressure of 180 lbs per square inch and also able to deliver their full output with steam at two third the full boiler pressure when exhausting against 25 lbs per square inch, back pressure. They are also to be suitable for working with a vacuum up to 10 inches in the exhaust pipe.

In the case of Diesel driven sets, fuel and cooling water tanks are not required.

B. Diesel Motor Launch Engines.

New or second hand marine Diesel units of from 80 to 100 B.H.P. direct drive or with reduction gear, and with propellers if available.

2. I am to request the favour of an early reply.

Yours sincerely
Ala eanu

Rajasevaprakashta B.T. Kesavaiengar Esq., B.A.,
Chief Secretary to the Government of Mysore,
Bangalore.
